CABLE SLITTER**

*Fiber Optic Jacket Slitter for
5.0mm, 5.0x2.0mm, 8.1x4.5mm
Drop Cable*

BENEFITS AND FEATURES

UCL SWIFT's Fiber Optic Drop Cable Slitter simplifies the slitting of drop cable jackets at midspan or end sections. The robust construction is well suited for busy contractors where speed is a factor. The design is ideal for FTTH technicians working with flat fiber drop cables. This drop cable slitter features the following:

Shielded, replaceable blades ensure safe operation and prevents injuries

Rugged metal construction of tool ensures long tool life

Ergonomic grip design reduces fatigue

Designed to cut 3 different shapes and sizes of drop cables with one slitter

Separates the jacket and strength members from the buffer tube leaving fiber undamaged

Makes error-free, precise separation of the toner wire on all brands of flat drop fiber cable

Ideal for FTTH applications where drop cables are used

Intuitive squeeze and slide operation consistently slits cable to desired lengths

SPECIFICATIONS
